ANUSRI BASKARAN

AI/ML Student | Machine Learning | Web Development | Generative AI

anusribaskaran2@gmail.com
+9445765310 | LinkedIn |GitHub
Thiruvarur,Tamilnadu.

SUMMARY

B.Tech student in Artificial Intelligence & Machine Learning with a strong foundation in **Python** and **Core ML** concepts. Hands-on experience building web-based AI applications using **FastAPI** and **Streamlit**. Gained technical exposure to **NLP**, **Generative AI fundamentals**, and data handling through academic projects. Proven ability to apply theoretical knowledge to real-world problems. Seeking a summer internship to contribute to data-driven projects and further develop technical expertise.

EDUCATION

BACHELOR OF TECHNOLOGY (AIML)
SRI RAMACHANDRA FACULTY OF ENGINEERING AND TECHNOLOGY, CHENNAI, TAMIL NADU
Expected Graduation: **2028** |CGPA: 8.87/10.0|

ST THERESA'S GIRLS HIGHERSECONDARY SCHOOL **2016 - 2024**
Thiruvarur,Tamil Nadu

SKILLS

AI/ML:
- Machine Learning
- Generative AI
- Zero-Shot Learning

PROGRAMMING LANGUAGES:
- Python
- Java
- JavaScript
- SQL

LIBRARIES AND FRAMEWORKS:
- Scikit-learn
- TensorFlow
- SHAP
- Pandas
- NumPy,Matplotlib

TOOLS AND PLATFORM:
- GitHub
- Docker
- Linux
- MongoDB
- MySQL

PROJECTS

AUTONOMOUS MULTI-AGENT ESG AUDITOR WITH HYBRID ZERO-SHOT RISK INTELLIGENCE
[PYTHON | FASTAPI | STREAMLIT | NLP BASICS]

- Developed an AI-driven ESG auditing platform leveraging multi-agent architecture, zero-shot learning, and transformer-based NLP. and buit the dashbord.
- Integrated semantic search, vector embeddings, and hybrid ML-NLP fusion for comprehensive ESG risk analysis.

ARUVADAI ARAN – AGRICULTURAL STORAGE PLATFORM
[HTML | CSS | JAVASCRIPT|REACT JS]

- Developed a web-based platform inspired by real-world agricultural challenges observed personally, Focusing on crop loss due to storage limitations and unexpected weather conditions.
- Designed a bilingual interface to improve accessibility for farmers and implemented a system to simulate storage .

INTERNSHIP

AI/ML INTERN – INTERNAL INTERNSHIP **MAY2025-AUGUST2025**
Sri Ramachandra Institute of Higher Education and Research

SHAP-DRIVEN UNSUPERVISED FETAL HEALTH RISK PREDICTION USING CORRELATION-GUIDED FEATURE SELECTION
[PYTHON|SCIKIT-LEARN|SHAP|PANDAS| NUMPY| MATPLOTLIB]

- Developed an unsupervised ML model for fetal health risk assessment using clustering and feature selection
- Applied SHAP for interpretability to identify key factors and generate explainable insights
- Analyzed healthcare data to support data-driven decision-making
- currently working on the research paper .

LANGUAGES

- English
- Tamil
- German (Basic)

CERTIFICATES

- MongoDB Fundamentals
- Microsoft Execl
- Linux Fundamentals
- AWS Academy Graduate · Machine Learning Foundations
